

Connected, actionable data and true Azalea Health integration

CoachCare leverages built-in Azalea Health workflows that allow practices to enroll and monitor their remote or chronic care patients efficiently without having to learn new systems.

Automated Claim Generation

Key to achieving a program that is efficient, effective and sustainable, is creating a seamless, intuitive user experience for the patient and provider, and that's what our integration with Azalea Health accomplishes.

Jeh Kazimi, Chief Product Officer

Azalea Health users have access to the uniquely comprehensive features of CoachCare's remote care programs:

- Telephonic patient enrollment
- Dedicated team of Care Managers
- Cellular connected devices with real time vitals data
- Automatic claims creation

CoachCare allows programs to get off the ground seamlessly with faster reimbursements – all while living in the Azalea Health environment.

Integrated Ordering and Enrollment

Through the fully-integrated CoachCare platform, our team enrolls qualified Medicare patients for the practice, prompted by enrollment flags and trigger ordering by service. Practices can see enrollment status real-time in the existing clinical workflow, and patients begin receiving CCM and RPM services in less than 5 days.

Integrated Documents and Claims

CoachCare is the only care management app integrated with Azalea Health providing automated claims creation via the CoachCare billing engine, eliminating the manual claim creation step for each patient, every month.
